YOU

Yes, you. Welcome to VEBAgroup World.

VEBA[®]group

VEBA group has been operating in the hydraulics sector since 1973. Certified ISO 9001 since 1997, the company produces fittings, threaded fittings, carbon steel and stainless steel fittings, assembled hoses, adapters and quick couplings.

Headquartered in Modena (Italy), VEBA group is a joint stock company that supplies products and solutions for hydraulic circuits on machinery in the building, earthmoving, agricultural, mining, shipbuilding and transport sectors the world over.

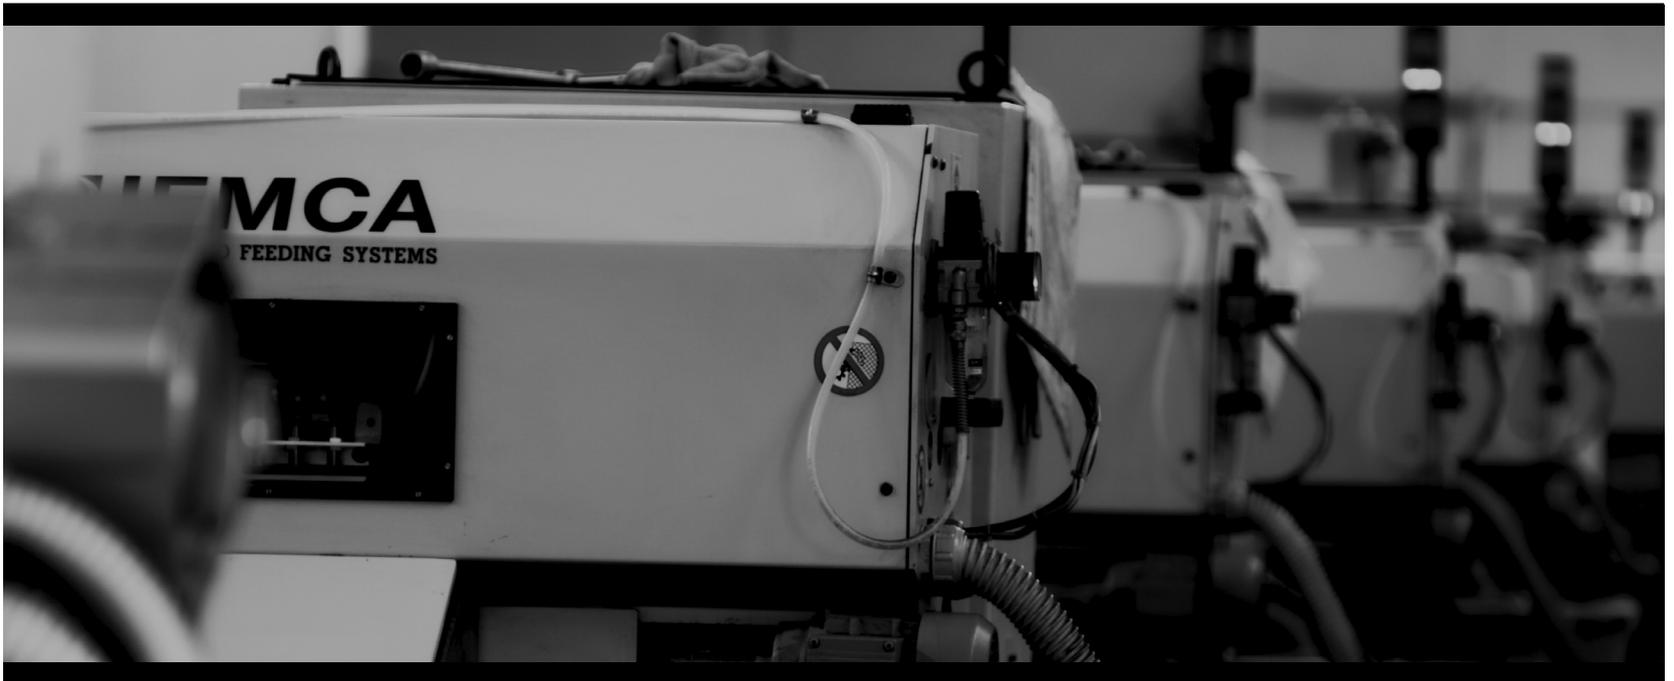

VEBA group opera nel settore oleodinamico dal 1973. Certificata ISO 9001 sin dal 1997, produce raccordi a pressione, raccordi filettati, raccordi in acciaio al carbonio e inox, tubi raccordati, adattatori e innesti rapidi.

Con sede a Modena, VEBA group è una società per azioni che fornisce internazionalmente prodotti e soluzioni per circuiti oleodinamici presenti su macchine per l'edilizia e movimento terra, del comparto agricolo e minerario, navale e dei trasporti.

Production always under control *La produzione sempre sotto controllo*

Multi-spindle turning machine and CNC with automatic steel bar loaders, but also automatic machines for 45 and 90 degrees elbows. All the productions, the heat and galvanising treatments are subjected to severe controls, according to ISO 9227 specifications.

Torni plurimandrino e CNC con caricatori automatici di barre d'acciaio, ma anche macchine automatiche per la realizzazione di curve a 45 e 90 gradi. Tutte le produzioni, i trattamenti termici e di zincatura sono soggetti a severi controlli di qualità, secondo le normative ISO 9227.

Technology and the Environment *Tecnologia e rispetto per l'ambiente*

VEBA group considers innovation, research & development and knowledge as its three main resources in international markets. Products are tested to ISO, EN, DIN and SAE standards and comply with the European directive 2002/95/EC, also known as RoHS (Restriction of the Use of Certain Hazardous Substances). The standard bans or limits the use of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls and polybrominated diphenyl ether.

Ricerca e sviluppo, innovazione, conoscenza. Sono le tre risorse principali di VEBA group sui mercati internazionali. I prodotti sono testati secondo le norme ISO, EN, DIN e SAE e sono conformi alla direttiva europea 2002/95/CE anche nota come RoHS (Restriction of the Use of Certain Hazardous Substances). La norma prevede il divieto e la limitazione di utilizzo di piombo, mercurio, cadmio, cromo esavalente, biofenili polibromurati e etere di difenile polibromurato.

Stockonline *Stockonline*

Consulting on www.veba-group.com the warehouses of VEBA group? Thanks to "Stockonline" it's now possible. You can see real time stocks, directly ask for offers, orders, verify the shipping status and the invoices with only few clicks. This service, reserved only to the distributors and to VEBA group retailers, guarantees large advantages in terms of cost and time savings.

Consultare su www.veba-group.com i magazzini di VEBA group? Grazie all'attivazione di "Stockonline" è possibile. Con pochi click si può vedere lo stock in tempo reale, si possono richiedere offerte, confermare ordini, verificare lo stato delle spedizioni e le fatture. Il servizio, riservato esclusivamente ai distributori e ai rivenditori VEBA group, garantisce vantaggi in termini di costi e tempi risparmiati.

Process and product certifications

Certificazioni di processo e di prodotto

Having reached the goal of ISO 9001 Certification since 1997, VEBA group never stops investing to renew and reinforce its organization. Always careful to the level of the technical services of its products, thanks to a strict and continuous control of the manufacturing process and thanks to appropriate systems of quality insurance, VEBA group works constantly to maintain the highest technological level of the manufacturing structures and of its products to guarantee the highest quality standard.

Certificata ISO 9001 sin dal 1997, VEBA group non ha mai smesso di investire per rinnovare e rinforzare la propria organizzazione. Da sempre attenta al livello delle prestazioni tecniche dei propri prodotti, grazie ad un rigoroso e continuo controllo dei processi produttivi e grazie ad appropriati sistemi di assicurazione della qualità, si impegna costantemente a mantenere alto il livello tecnologico delle strutture di produzione e dei prodotti, per garantire standard di altissima qualità.

Galvanising

Zincatura

In accordance with the provisions of RoHS Directive no. 2002/95/EC, we have switched from galvanising with hexavalent chromium Cr6 (“yellow”) to 6-free chromium Cr3, i.e. hexavalent chromium free passivation and the use of an organic sealant coating (“white”) to reduce the impact of environmental pollution when scrapping. Through its research and development laboratory, VEBA group conducts environmental chamber tests in a saline mist to evaluate the durability of its suppliers’ galvanisation, i.e. when red oxide (“rust”) appears in accordance with standard ASTM B 117. Veba group has recorded the presence of red oxide on their products between the 240 and 400 hours.

In osservanza a quanto indicato dalla Direttiva RoHS n.2002/95/CE si è passati dalla zincatura al cromo esavalente Cr6, (“gialla”), al cromo 6-free Cr3, ovvero alla passivazione priva di cromo esavalente e con copertura organica di sigillante, (“bianca”), in modo da ridurre l’impatto dell’inquinamento ambientale in fase di rottamazione. Veba group attraverso il laboratorio di ricerca e sviluppo effettua test in camera ambientale in nebbia salina per valutare la durata della zincatura dei propri prodotti, ovvero quando avviene la comparsa dell’ossido rosso, (“ruggine”), secondo la norma ASTM B 117. Dai test effettuati Veba group ha registrato la presenza di ossido rosso sui propri prodotti tra le 240 e le 400 ore.

Technical test

Test e prove tecniche

Veba group conducts bench burst and impulse testing in accordance with standard SAE J343. This allow it to further validate the pressing diameters that are used for pressing packaged hoses as indicated in the technical manual and the pressing table. The bench test is used for burst or pressurisation testing of various hydraulic components, particularly hoses and fittings with a controlled pressure curve. The pressure test is performed at double the pressure of use while the burst test must be performed at a pressure greater than or equal to 4 times the working pressure.

Veba group effettua test al banco impulso e scoppio secondo la norma SAE J343. I test consentono di validare ulteriormente i diametri di pressatura presenti sul manuale tecnico e utilizzati in fase di pressatura di tubi assemblati. Il banco prova è destinato alle prove di scoppio o pressurizzazione di vari componenti oleodinamici, principalmente tubazioni e raccordi con una rampa di pressione controllata. La prova di tenuta viene effettuata alla pressione doppia rispetto alla pressione di utilizzo, mentre la prova di scoppio deve avvenire ad una pressione maggiore o uguale a 4 volte la pressione di lavoro.

Service and distribution

Servizio e distribuzione

VEBA group goes beyond the normal concept of negotiations based on price, quality and delivery times and instead aims to create a genuine partnership with customers, sharing technological expectations, development strategies and investments. By basing its relationship with customers on these aspects, VEBA group can exploit a closely-knit network of distributors in the key world markets to offer a global support and consulting service. Would you like to be an official distributor and enjoy the advantages? Ask how at: info@veba-group.it

Creare un rapporto di partnership con il cliente. VEBA group supera il concetto della normale trattativa basata su prezzo, qualità, tempi di consegna e punta alla condivisione con il cliente di aspettative tecnologiche, strategie di sviluppo e investimenti. Instaurare e fondare il rapporto su questa base permette a VEBA group - attraverso una fitta rete di distributori nei principali mercati mondiali - di offrire un servizio globale di assistenza e consulenza. Vuoi diventare un distributore ufficiale e godere dei relativi vantaggi? Chiedici come: info@veba-group.it

Use your own part number and save time

Usate il vostro codice e risparmiate tempo

Thanks to our Catalogue, Technical manual, Price List and Charts we're able to translate your codes in our codes faster and easily.

Grazie al nostro Catalogo, Manuale tecnico, Listino e tabelle siamo in grado di tradurre i vostri codici nei nostri più velocemente e facilmente.

Cancel an order with short notice and/or return parts

Cancellare e/o ricevere un reso con breve anticipo

If you need to cancel an order, all we ask is a written communication (mail or fax) only one week before the products leave our company. Only special orders, made specifically for you, are not cancellable. If you need to return parts, simply write us to get the authorization. The parts must be packaged as original.

Se avete bisogno di cancellare un ordine, tutto ciò che chiediamo è una comunicazione scritta (mail o fax) solo una settimana prima che i nostri prodotti lascino la nostra azienda. Soltanto ordini speciali, fatti specificamente per voi, non sono cancellabili. Se avete bisogno di restituire dei pezzi, semplicemente scriveteci per ottenere l'autorizzazione. I pezzi devono essere impacchettati come in origine.

Custom dedicated inventories

Magazzini dedicati ai clienti

We consider our customers as partners. Our business is strictly connected on the customer's business and VEBA group's mission is to serve and satisfy the requests of all the partner also with dedicated inventories.

Consideriamo i nostri clienti dei partner. Il nostro lavoro è strettamente connesso con il lavoro dei nostri clienti e la missione di VEBA group è servire e soddisfare le richieste di tutti i nostri partner anche con magazzini dedicati.

Packaging

Imballaggio

The product is packaged in accordance with international standards and internal specifications. In particular, fumigated pallets subjected to a phytosanitary treatment are used to prevent the diffusion of harmful organisms in accordance with ISPM-15 of the FAO. Veba group has set up an entirely customer-oriented delivery process. The packing list and the (customisable) box labels provide complete product information: Veba group code, customer code, batch no., quantity, Veba order reference, customer order reference, box no.

Il prodotto viene imballato secondo normative internazionali e specifiche interne. In particolare vengono utilizzati pallet fumigati, ovvero sottoposti ad un trattamento fitosanitario che ne impedisce il diffondersi di organismi nocivi, secondo l'ISPM-15 della FAO. Veba group ha disposto un processo di spedizione completamente orientato al cliente, ovvero attraverso il packing list e le etichette apposte sulle scatole vengono fornite tutte le informazioni riguardanti il materiale: codice Veba group, codice cliente, n° di lotto, quantità, riferimento ordine Veba, rif. ordine cliente, n° box.

Fluid power training

Formazione oleodinamica

Would you like to be a VEBA group's official distributor and enjoy the advantages but you don't have the know how? Or simply you want to improve your acknowledge? No problem, we can support you with a fluid power training and other advantages.

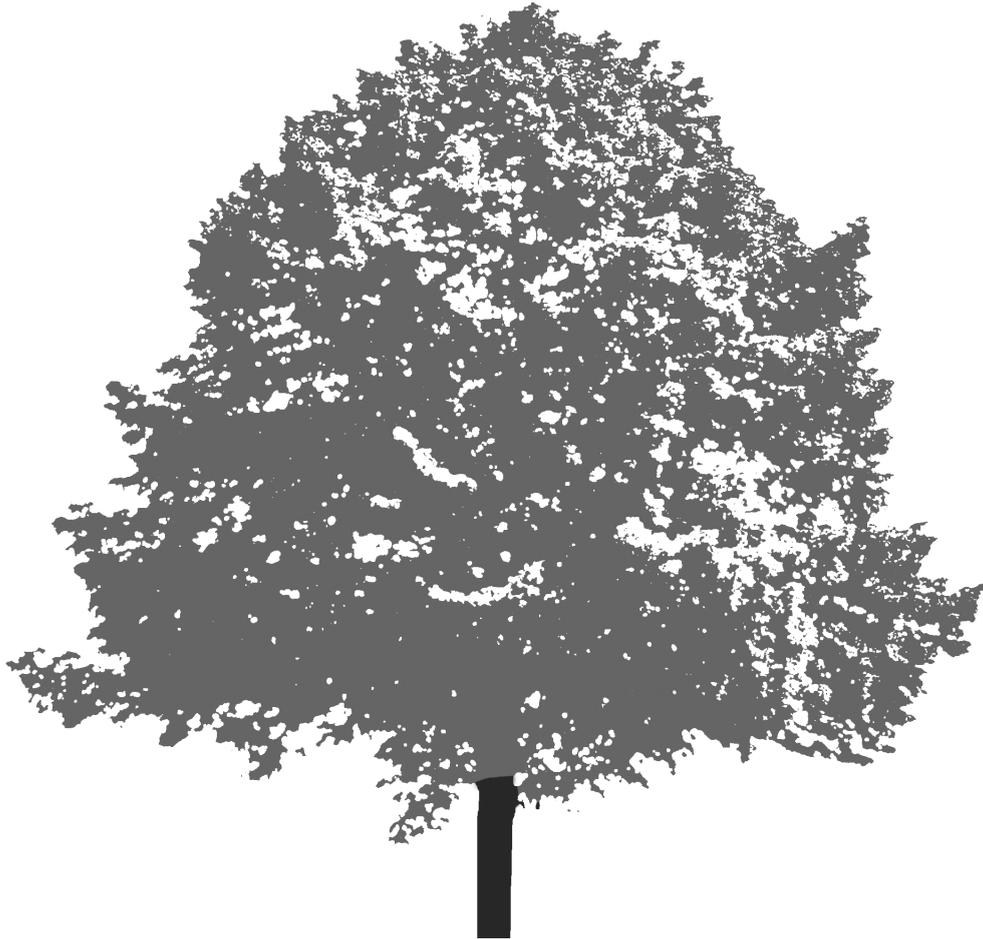

Vorreste diventare distributori ufficiali di VEBA group e godere dei vantaggi ma non sapete come? O semplicemente volete migliorare la vostra conoscenza? Nessun problema, possiamo supportarvi con una formazione oleodinamica e altri vantaggi.

Hose pressure testing & certification

Test di pressione dei tubi & omologazione

We test everything we produce. It's only for this reason that we can give warranties on our products. If you need to test something, our technical office is available to satisfy your requests. At the end of the test we can provide the test and the certification. Veba group offers a number of practical recommendations for selection, installation and maintenance of assembled hoses. For more detailed information refer to the latest version of standard SAE J1273. **IMPORTANT:** Inappropriate selection, installation or maintenance may result in premature deterioration of the assembled hose and lead to personal injury or damage to property. The hydraulic usage of the product must not be underestimated.

*Testiamo tutto ciò che produciamo. E' appunto per questa ragione che forniamo garanzie dei nostri prodotti. Se avete bisogno di testare qualcosa il nostro ufficio tecnico è disponibile a soddisfare le vostre richieste. Alla fine dei test possiamo fornire i risultati e l'omologazione. Veba group dispone di alcune raccomandazioni pratiche per la selezione, l'installazione e la manutenzione del tubo flessibile raccordato. Per eventuali approfondimenti consultare la norma SAE J1273 nella versione aggiornata. **ATTENZIONE:** La selezione, installazione e manutenzione impropria potrebbe degradare prematuramente il tubo assemblato e creare danni a persone o cose. Non si deve quindi sottovalutare l'impiego oleodinamico del prodotto.*

Greenhouse effect
Water and air pollution
Acid rains
Economical and financial crisis

The change *Il cambiamento*

Why becoming more efficient?

- Because it's convenient
- Because the sudden fall of a lot of systems shows that the actual approach is not sustainable
- Because we want it. VEBAgroup wants to communicate to all that is the right moment to bring these changes to have a better planet.

Perché diventare più efficienti?

- *Perché conviene*
- *Perché il crollo di tanti sistemi dimostra che l'approccio attuale non è sostenibile*
- *Perché lo vogliamo. VEBAgroup desidera comunicare a tutti che è il momento giusto di apportare questi cambiamenti per rendere il pianeta migliore.*

Change is convenient *Cambiare conviene*

Greenhouse effect, water and air pollution, acid rains, economical and financial crisis: the list is well known. In an interconnection era, characterized by web and networks, when a crisis effects an area of the planet, there is a quick reflect elsewhere. Nevertheless, these problems represent also an opportunity. People all over the world are ready to change? VEBAgroup is ready, for us changing is a must.

L'elenco dei problemi è ormai noto: l'effetto serra, l'inquinamento dell'acqua e dell'aria, le piogge acide, le crisi economiche e finanziarie. Nell'era della interconnessione, del web e dei network, quando si verifica una crisi in un'area del pianeta, essa può ripercuotersi altrove in pochi giorni o addirittura ore. Tuttavia, questi problemi rappresentano anche un'opportunità. Le persone in tutto il mondo sono pronte al cambiamento? VEBAgroup lo è, per noi è un dovere.

In practice, what are we doing? *In pratica, cosa stiamo facendo?*

Research and development, innovation, knowledge. These are the three main resources of VEBA group that will produce a sustainable and positive change.

Recycling: recover material to re-use instead of dispose of them. Can be recycled: raw materials, half-finished or different materials derived from working process, from other business partners that produce different materials that otherwise would go wasted or thrown like litter. The recycling prevents a potential waste of useful materials, reduces the consumption of raw materials, reduces the use of energy and consequently the emission of greenhouse gases. Recycling is a key concept and is an irreplaceable component in the hierarchy of management of the litter. The material that can be recycled are all the litter that are re-used to produce new equal objects (glass, card) or used to produce new materials (wood, woven).

Promote a greater utilization of the catalogues in digital format instead of catalogues in paper format. Technology allows it, every company has the possibility to surf internet and use email. If it's necessary to print, try to use eco-printing systems on FSC certified paper. The FSC brand identifies the products containing wood coming from forests managed in correct manner and responsibly according to strict social and economical environmental standard.

Stockonline: consulting on line the warehouses of VEBA group to see real time stocks, directly ask for offers, orders, verify the shipping status and the invoices with only few clicks. Thanks to Stockonline we would stop using fax, paper and ink.

Recovering of oil and burr in automatic productions. We don't waste even a drop of oil and we throw away nothing. We also try to re-use water used during our productions.

Ricerca e sviluppo, innovazione, conoscenza. Sono le tre risorse principali di VEBA group che produrranno un cambiamento di tipo sostenibile e quindi positivo.

***Riciclaggio:** recuperare materiali per riutilizzarli invece di smaltirli. Possono essere riciclate materie prime, semilavorati o materie di scarto derivanti da processi di lavorazione, da business partner che producono materie di scarto che andrebbero altrimenti sprecate o gettate come rifiuti. Il riciclaggio previene lo spreco di materiali potenzialmente utili, riduce il consumo di materie prime, riduce l'utilizzo di energia e conseguentemente l'emissione di gas serra. Il riciclaggio è un concetto chiave nel moderno trattamento degli scarti ed è un componente insostituibile nella gerarchia di gestione dei rifiuti. I materiali riciclabili sono tutti i rifiuti che possono essere riutilizzati per produrre nuovi oggetti uguali allo scarto (vetro, carta) oppure utilizzati per produrre nuovi materiali (legno, tessuti).*

***Promuovere un maggiore utilizzo dei cataloghi in formato digitale,** rispetto ai cataloghi in formato cartaceo. La tecnologia ce lo permette, ogni azienda ha oggi la possibilità di accedere a internet e utilizzare la posta elettronica. In caso di necessità di stampare, privilegiamo l'utilizzo di sistemi di eco-printing su carta certificata FSC. Il marchio FSC identifica i prodotti contenenti legno proveniente da foreste gestite in maniera corretta e responsabile secondo rigorosi standard ambientali, sociali ed economici.*

***Stockonline:** consultare su www.veba-group.it i magazzini di VEBA group. Con pochi click si può vedere lo stock in tempo reale, si possono richiedere offerte, confermare ordini, verificare lo stato delle spedizioni e le fatture. Il servizio garantisce vantaggi in termini di costi e tempi risparmiati. Cerchiamo di eliminare l'utilizzo del fax, che comporta utilizzo di carta, inchiostro.*

VEBA group's products comply with the RoHS Directive (2002/95/EC). The RoHS Directive stands for "the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment". This Directive bans the placing on the EU market of new electrical and electronic equipment containing more than agreed levels of lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) flame retardants.

To save money, energy and to decrease the pollution, **we correctly set the offices and warehouses thermostats in summer and winter.** We are providing every light with low energy consumption bulbs and we will provide to use, wherever possible, automatic sensors of presence to avoid waste of light when people is absent.

Since 2005, **we apply the chrome 3 galvanizing treatment on our fittings.** According to the European Instruction 2000/53/EC. The normative imposes the prohibition of the utilization of chrome 6, harmful for the environment. Test in salty spray machines and the research for alternative products of same chrome 6 performances permitted us to find a better and clean solution, without polluting.

Do you want to participate in the change? Tell us what we can improve, email us on: info@veba-group.it and propose your idea.

Siamo conformi alla direttiva europea 2002/95/CE anche nota come RoHS (Restriction of the Use of Certain Hazardous Substances). La norma prevede il divieto e la limitazione di utilizzo di piombo, mercurio, cadmio, cromo esavalente, biofenili polibromurati e etere di difenile polibromurato (ritardanti di fiamma).

Risparmiamo energia: *settare correttamente i termostati in estate e in inverno negli uffici e nel capannone consente di inquinare meno. Stiamo dotando ogni punto luce di lampadine a basso consumo energetico e installando, ovunque possibile, impianti di accensione e spegnimento a sensori di presenza per evitare sprechi di luce.*

Sin dal 2005 applichiamo su tutti i nostri raccordi il trattamento di zincatura a base di cromo 3, secondo quanto prescritto dalla Direttiva Europea 2000/53/CE. La normativa impone il divieto di utilizzo di cromo 6, dannoso per l'ambiente. Test in nebbia salina e ricerca di prodotti alternativi di pari prestazioni al cromo 6 hanno consentito di trovare una soluzione pulita e altamente performante, senza inquinare.

Vuoi partecipare al cambiamento? Suggestisci cos'altro possiamo fare, scrivici su info@veba-group.it e proponi la tua idea.

How to install flexible hoses *Come installare il tubo flessibile*

To obtain the better yield, follow the recommendations restored: the flexible hose should work within theoretical limits of pressure and ray of bend (to such purpose, we invite you to use the charts). The hoses should not undergo twisting; the length of the hose under the connector have to be at least 6 times the diameter of the hose. In the pictures under restored, we emphasize some examples of right and wrong connections.

Al fine di ottenere il migliore rendimento, si consiglia di seguire le raccomandazioni sotto riportate: il tubo flessibile deve lavorare entro limiti teorici di pressione ed al raggio di curvatura (a tale scopo, Vi invitiamo ad utilizzare le relative tabelle). Il tubo non deve subire torsioni; la lunghezza del tubo sotto il raccordo deve essere almeno 6 volte il diametro del tubo. Il tipo di raccordi adottati deve ridurre al minimo il numero di curvature del tubo. Nelle figure sotto riportate, evidenziamo alcuni esempi di collegamenti giusti ed errati.

Hoses

Linea Tubi

Hoses

Linea tubi

PROflex is the VEBA group's registered trademark for flexible hoses. The range includes:

- braid hoses for low pressures
- wire braid hoses for medium pressures
- wire braid washer hoses for medium pressures
- multispiral hoses for high and very high pressures
- multispiral Waterblast hoses for high and very high pressures
- polyamide PTFE braid hoses for high and very high pressures.

The PROflex hoses are provided in roll, with different length or cut off and crimped. Our hoses are conform to SAE, DIN, BS and UNI ISO standard.

Our technical office is completely available to satisfy your request. Besides, we can provide conformity certificate of our products and on request any kind of internal wash (flushing). Always on request, we can provide National and International certificates.

Through the agreement signed with the Japanese giant **Yokohama**, VEBAgroup has expanded its range of hydraulic hoses and launched a series of new conception products.

The new high pressure hose line, called "Exceed", was developed by **Yokohama** for the end user and will now be distributed by the Modena based company.

The Exceed line fully complies with the highest pressure and length according to SAE standards and numerous international standards. **Yokohama's** Exceed hoses are available in 10 sizes with pressures from 21 megapascals to 35 megapascals.

PROflex è il marchio registrato di VEBA group per tubi flessibili. Fanno parte della gamma:

- *tubi trecciati tessili per basse pressioni*
- *tubi trecciati acciaio per medie pressioni*
- *tubi trecciati acciaio per lavaggio a medie pressioni*
- *tubi multispiral per alte ed altissime pressioni*
- *tubi multispiral waterblast per alte ed altissime pressioni*
- *tubi trecciati in poliammide ptfe per alte ed altissime pressioni.*

I tubi flessibili PROflex vengono normalmente forniti in rotolo con marcatura DIN, SAE, UNI, ISO, in lunghezze variabili oppure tagliati e raccordati.

L'Ufficio Tecnico è a Vostra completa disposizione per valutare ogni proposta. Siamo inoltre in grado di fornire i Certificati di Conformità del prodotto ed il prodotto stesso con particolari tipi di pulizia interna (flussaggio). A richiesta possiamo fornire diversi tipi di certificazione di approvazione nazionale ed internazionale.

*Grazie all'accordo siglato con il colosso giapponese **Yokohama**, VEBAgroup amplia la propria offerta di tubo idraulico e propone sul mercato una serie di prodotti di nuova concezione.*

*Exceed è il nome della nuova linea di tubi ad alta pressione che **Yokohama** ha sviluppato per gli utilizzatori finali e che è ora distribuita dall'azienda modenese. Tutti i tubi Exceed sono conformi ai più elevati gradi di pressione e durata secondo gli standard SAE e numerosi standard internazionali. **Yokohama** propone i tubi Exceed in 10 misure con pressioni da 21 megapascal a 35 megapascal.*

Advantages:

- extremely light
- much more flexible;
- a tighter bend radius and makes it possible to reduce the encumbrance on machinery for indoor and outdoor use.

The hoses are produced according to the international regulation ISO 18752 making the choice of product simple and fast for the end user.

The new **Yokohama** hose range, with its entire range of fittings and specific crimping chart, allows VEBAgroup to offer its customers a new generation product, which is integrated and tested and frees the customer from the burden and potential problems of assembling the product themselves.

The Modena based company becomes the Italian partner of the Japanese giant and expands its hydraulic hose offer.

Vantaggi:

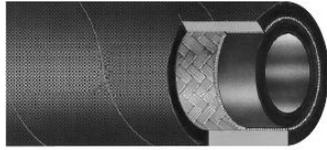

- *più leggeri*
- *più flessibili;*
- *richiedono inoltre spazi inferiori e consentono così una riduzione di ingombro su macchinari ad uso esterno o interno.*

I tubi sono prodotti secondo la normativa internazionale ISO 18752 rendendo così la scelta del prodotto da parte dell'utilizzatore finale semplice e veloce.

*VEBAgroup, grazie alla nuova linea di tubo **Yokohama**, ad una gamma completa di raccordi e alla messa a punto di relative specifiche tecniche espresse nelle tabelle di pressatura, offre al cliente un prodotto di nuova generazione, integrato e testato, che lo libera dal problema e responsabilità di assemblaggio.*

VEBA fittings and Yokohama hoses: the complete and certified package.

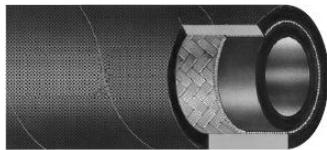

EN 854 - 2TE
 Inner Tube : synthetic rubber
 Reinforcement : 1 textile braid
 Cover : oil, abrasion, ozono and weather resistant synthetic rubber
 Working Temperature : -40°C / +121°C

Thanks to our machines we have the possibility to braid up to 1SN 1" or 2SC 1" with galvanized steel or AISI 316L braid, minimum q.ty 100mt.
Grazie alle nostre macchine abbiamo la possibilità di trecciare fino a 1SN 1" o equivalente 2SC 1", in acciaio zincato e in acciaio inox AISI 316L per q.tà superiori ai 100mt.

PLASTIC SLEEVE

Plastic sleeve is produced and developed to protect hydraulic and pneumatic hoses from deterioration, shocks and abrasion. They improve the visibility of hoses, thus preventing dangerous situations. It's manufactured by direct compression of the raw material (polyethylene), to increase the resistance to the abrasion. It's resistant to acids, oils and solvents and it's UV protected and antistatic.

Working temperature: -20 / +100°C

SPIRALE IN PLASTICA

La spirale in plastica è stata prodotta e sviluppata per proteggere i tubi oleodinamici e pneumatici dal deterioramento, urti e abrasioni. Rende i tubi più visibili contribuendo a prevenire possibili urti o incidenti. Fabbricato con materiale plastico polietilene compresso direttamente per aumentare la resistenza. Resistente agli acidi, olii, solventi e fornisce un'ottima protezione ai raggi UV ed è antistatico.

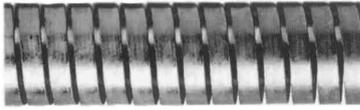

Temperatura di lavoro: -20 / +100°C

*Cap's in heat shrink pvc

**Alternative closing system to the thread plug ideal to reduce their level of stock

***Time of retraction about a second

*Capsule in pvc termoretraibili

**Sistema di chiusura alternativa al tappo filettato atto a ridurre il livello di stock degli stessi

***Tempo di retrazione intorno al secondo

Fittings Line

Linea Raccordi

Fittings line

Linea raccordi

The VEBAgroup fittings range is made from the best stock bar steel controlled and surface protected with a zinc coating treatment according to European Regulation 2002/95/EC, also known as RoHS (Restriction of the Use of Certain Hazardous Substances) and European Regulation 2000/53/EC that imposes strict limitations regarding the use of compounds made of Chrome VI.

All the range follows the International Standards as BSPP, SAE, JIC, JIS, DIN, NPTF, NPSM, etc...

Our fittings range includes:

Hose connectors Standard type

suitable for flexible hoses for medium and high pressures with steel/textile reinforced braid with or without external skive and steel armoured with external skive.

Hose connectors Interlock type

suitable for flexible hoses for high and very high pressures for impulse, steel armoured with internal/external skive.

Hose connectors SuperSpiral type

suitable for flexible hoses for high and very high pressures for impulse, steel armoured without internal/external skive.

Hose connectors One Piece type

fittings with pre-crimped ferrule suitable for flexible hoses for medium and high pressures with steel/textile reinforced braid without external skive.

Advantages of One piece fittings are:

1. no risk of mistakes in the choice insert-ferrule;
2. time saving in picking from the inventories.

Hose connectors Waterblast type

suitable for flexible waterblast hoses for ultra-high pressure.

La linea raccordi di VEBA group è realizzata con acciai controllati e protetti con trattamenti superficiali di zincatura rispondenti alla Direttiva Europea 2002/95/CE anche nota come RoHS (Restriction of the Use of Certain Hazardous Substances) e alla Direttiva Europea 2000/53/CE che impone severe limitazioni sull'uso del Cromo VI.

Tutta la gamma è realizzata seguendo le specifiche internazionali BSPP, SAE, JIC, JIS, DIN, NPTF, NPSM, ecc...

La gamma comprende:

Raccordi a pressione serie Standard

adatti al montaggio su tubazioni flessibili per medie ed alte pressioni con rinforzo trecciato acciaio e tessile con o senza pelatura esterna e spiralati con pelatura esterna.

Raccordi a pressione serie Interlock

adatti al montaggio su tubazioni flessibili per alte ed altissime pressioni ad impulsi, spiralati con pelatura esterna ed interna.

Raccordi a pressione serie SuperSpiral

adatti al montaggio su tubazioni flessibili per alte ed altissime pressioni ad impulsi, spiralati senza pelatura esterna ed interna.

Raccordi a pressione serie One Piece

raccordi con boccola pre-pinzata adatti al montaggio su tubazioni flessibili per medie ed alte pressioni con rinforzo trecciato acciaio e tessile senza pelatura esterna.

I vantaggi dei raccordi One Piece sono:

1. nessun rischio di errore nella scelta inserto-boccola;
2. minor tempo nel prelievo da magazzino.

Raccordi a pressione serie Waterblast

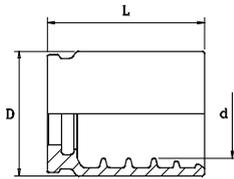

adatti al montaggio su tubazioni waterblast per altissime pressioni.

Adaptors

produced in solid piece of steel accordingly to International standars BSP, JIC, ORFS, DIN, NPTF, NPSM, ecc...

Adattatori

realizzati da pezzo unico di acciaio seguendo le specifiche internazionali BSP, JIC, ORFS, DIN, NPTF, NPSM, ecc...

One Piece

Pezzo Unico

One Piece

Pezzo unico

Hose connectors One Piece type

fittings with pre-crimped ferrule suitable for flexible hoses for medium and high pressures with steel/textile reinforced braid without external skive.

The series SP is good for this flexible hoses:

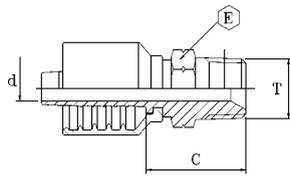

SAE 100 R1AT
EN 853 1SN
SAE 100 R2AT
EN 853 2SN
EN 857 2SC
SAE 100 R3
SAE 100 R4

Raccordi a pressione serie One Piece

raccordi con boccola pre-pinzata adatti al montaggio su tubazioni flessibili per medie ed alte pressioni con rinforzo trecciato acciaio e tessile senza pelatura esterna.

La serie SP è adatta a tubi flessibili del tipo:

*SAE 100 R1AT
EN 853 1SN
SAE 100 R2AT
EN 853 2SN
EN 857 2SC
SAE 100 R3
SAE 100 R4*

RECOMMENDATIONS FOR THE USE OF WATERBLASTING ASSEMBLIES

Please find enclosed the following recommendations for the safe and correct use of waterblasting assemblies:

- **DON'T MIX AND MATCH:** VEBA group strictly recommends the use of the integrated waterblasting package. The use of alternative hose or fittings can result in the assembly poor quality and reliability.
- If waterblast assemblies are used with a pressure rate exceeding the maximum working pressure indicated, the assemblies structure suffers for over-stressed situation. For the same reason, also **pulsating pressure** situations need to be avoided.
- **Relief valves** must be used to preserve waterblast equipment and hose assemblies
- **Waterblast assemblies must never be used in "hang-down" position** because it brings an over-stressed situation for hose and fittings.
- Strictly avoid to apply any **external force** on the hose assembly, such as axial tension, twisting, kinking or crushing.
- **Temperature** influences the resistance to leakage. Working temperature must be maintained below 70° C.
- Hose assemblies need to be **replaced in case of damage**, such as:
 - hose cover abrasion, cuts, chemical attack, corrosion
 - reinforcement crushing or twisting
- In line with **international regulations**, all waterblasting assemblies must be tested to 150% of the indicated maximum static working pressure before using.
- **High pressure water has always to be considered extremely dangerous.** The escaping stream of liquid can cause physical damage and also a sudden repositioning of the hose line in a dangerous manner (whip). Anyone handling waterblasting equipment must wear proper protective clothing, boots and eyes protection.
- For applications with a **working pressure exceeding 500 bar**, the use of connector **safety devices** is mandatory for any place where significant presence of person is foreseeable. Where technically not possible alternative measures shall be considered and where necessary instructions shall be given in the information for use.
- **Hose elongation and contraction** need to be taken in consideration. Under pressure, the hose can vary from -2% up to +2% in length!

RACCOMANDAZIONI PER L'UTILIZZO DEL TUBO WATERBLAST

Si prega di seguire le seguenti raccomandazioni per un uso sicuro e corretto del tubo **Waterblast**:

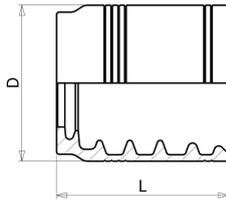

- **NO MIX: VEBA group** raccomanda assolutamente l'utilizzo del pacchetto **Waterblast** integrale.
L'utilizzo di tubi o raccordi alternativi può avere come risultato la poca qualità e affidabilità del tubo assemblato.
- Nel caso in cui gli assemblaggi Waterblast vengano usati con una pressione che eccede dalla massima pressione di lavoro indicata, la struttura degli stessi soffrirà per una situazione di eccessivo stress.
Per la stessa ragione, anche le situazioni in cui vi sia una **pressione pulsante** devono essere evitate.
- Le **valvole di sicurezza** devono essere utilizzate per preservare l'equipaggiamento **Waterblast**.
- **Gli assemblaggi Waterblast non devono mai essere sospesi verso il basso** perché ciò comporta un' eccessivo stress a tubo e raccordo.
- Evitare assolutamente l'applicazione di qualunque **forza esterna** sul tubo assemblato, come torsione, tensione assiale, deformazione o schiacciamento.
- La **temperatura** influenza la tenuta del tubo assemblato.
La temperatura di lavoro deve mantenersi al di sotto dei 70° C.
- Gli assemblaggi dei tubi devono essere **sostituiti in caso di guasto**, come ad esempio:
 - abrasione della copertura del tubo, tagli, contatto con sostanze chimiche e corrosione.
 - schiacciamento del rinforzo o torsione.
- In linea con i **regolamenti internazionali**, prima dell'utilizzo tutti gli assemblaggi Waterblast devono essere **testati al 150%** della massima pressione statica di lavoro indicata.
- **L'alta pressione dell'acqua è da considerarsi sempre estremamente pericolosa**. La fuoriuscita del liquido e anche un improvviso riposizionamento del tubo in una maniera pericolosa (frusta), possono causare seri danni fisici.
Chiunque maneggi l'equipaggiamento Waterblast deve indossare appropriati indumenti protettivi, stivali e protezioni per gli occhi.
- Per le applicazioni con una **pressione di lavoro che supera i 500 bar**, l'uso dei **dispositivi di sicurezza** dei raccordi, come cavi, catene e guaine di contenimento, è obbligatorio per ogni luogo dove è prevista una significativa presenza di persone.
Dove ciò non è tecnicamente possibile devono essere previste misure alternative ugualmente efficaci.
- Prendere in considerazione l'allungamento e contrazione del tubo quando si installano **dispositivi di sicurezza**. Sotto pressione il tubo può variare in lunghezza da - 2% fino al + 2%!

CHIAVE DEL CODICE
Code's Key

Modalità di utilizzo del codice
(use of the code)

Il cliente, per effettuare un ordine di qualsiasi prodotto descritto a catalogo, deve indicare il codice composto dai suddetti campi "A", "B", "C".
 Il campo "A" è un numero che indica il gruppo o famiglia del prodotto.
 Il campo "B" indica le caratteristiche del prodotto (dimensioni, tipo, tipo di montaggio, schema idraulico, pressione, molle, foro di regolazione...). Le caratteristiche di ogni prodotto saranno disponibili in ogni scheda prodotto all'interno del catalogo.
 Il campo "C" indica le personalizzazioni richieste dal cliente.

The customer, in order to place an order for any product described in the catalogue, have to indicate the code of the above fields "A", "B", "C".

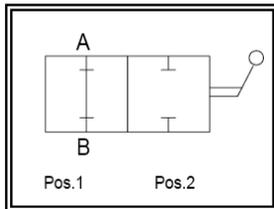

Field "A" indicates the product family.

Field "B" represents the characteristics of the product (size, type, mounting type, hydraulic scheme, pressure, spring, flow adjustment hole...).

The characteristics of each products will be available in every data sheet in the catalogue.

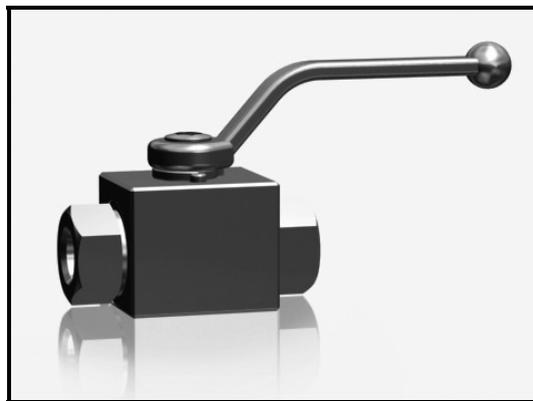

The "C" indicates the customisations requested by the customer.

2 and 3 ways ball valves *rubinetti a sfera 2 e 3 vie*

RUBINETTO A SFERA 2 VIE Two ways ball valve

DENOMINAZIONE / DENOMINATION	CODICE / CODE
RS 2/..	525. ...

APPLICAZIONE:

I rubinetti a sfera a due vie sono utilizzati per permettere l'apertura o la chiusura del flusso dell'olio negli impianti. Il trafilamento anche alla massima pressione è inesistente.

Funzionamento:

Con la leva in posizione 1 le bocche sono aperte e consentono liberamente il passaggio al flusso.
Con la leva in posizione 2 le bocche sono chiuse e il flusso è completamente bloccato.

APPLICATION:

2 way ball valves are used for opening and closing the oil flow in the hydraulic circuit. Ball valves have no leakage.

Functioning:

When the lever is in position 1, flow crosses the valve in free way.
When the lever is in position 2, flow is totally stopped.

GUSCIO / Seal Ball	Delrin
O - ring	NBR
LEVA/ Handle	Acciaio / Steel
MOLLE/ Spring	Acciaio / Steel

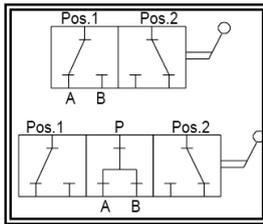

Pressione massima 350 bar
Max pressure 350 bar

APPLICAZIONE:

Il lavoro di un cilindro idraulico può essere determinato dal montaggio di un limitatore di corsa nel sistema. Nella posizione di partenza, la valvola è aperta. Il cavo tiene collegato lo stelo del cilindro con la maniglia della valvola e la muove quando viene tirata. Il movimento risultante muove la sfera a "T" nella posizione di chiusura, in modo da interrompere il flusso. Il cilindro si ferma nella posizione primitiva. Dopo la chiusura della valvola separata, la parte superiore della RSS è depressurizzata. La pressione è trasferita sulla sfera e passa attraverso il forellino della sfera a T. Il cilindro quindi si ritrae e la molla a spirale si rilassa riportando la sfera e lo stelo nella posizione di partenza (aperto).

APPLICATION:

The working of a hydraulic cylinder can be determined by mounting a stroke limiter in the system. In the starting position, the valve is open. The cable attached to the cylinder rod and to the valve handle operates the handle when stretched. The resulting movement turns the T-ball with the stem into the closed position, thus interrupting the flow. The cylinder rod stays in the original position. After closing the idle running at the separate control valve, the upstream side of the RSS is depressurised. The pressure is transferred downstream operating the free moving ball, and pass through its T-port design. The cylinder then retracts and the spiral spring relaxes, retuning the ball and stem to the original position.

RUBINETTO A SFERA 3 VIE
Three ways ball valve

DENOMINAZIONE / DENOMINATION	CODICE / CODE
RS 3/..	530. ...

APPLICAZIONE:

I rubinetti a sfera a tre vie sono utilizzati per deviare il flusso dell'olio negli impianti utilizzando una sola alimentazione.

Funzionamento:

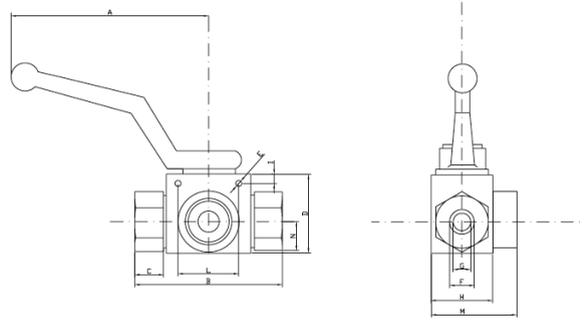

Tipo L (centro chiuso) : con la leva in posizione centrale tutte e tre le bocche sono parzialmente aperte. La leva ruota di 90°.
Tipo T (centro aperto) : con la leva in posizione centrale tutte e tre le bocche sono completamente aperte. La leva ruota di 180°.

APPLICATION:

3 way ball valves are used to divert the oil flow in plants using a single valve.

Functioning:

L ball Type: (close centre) : with the handle in middle position, all three ways are partially open. The handle turns just 90°.
T ball Type: (open centre) : with the handle in middle position, all three ways are fully open. The handle turns 180°.

VRSE/L38-14	3/8"	30	12,5	17	66	8	115	17	32	40	22	300

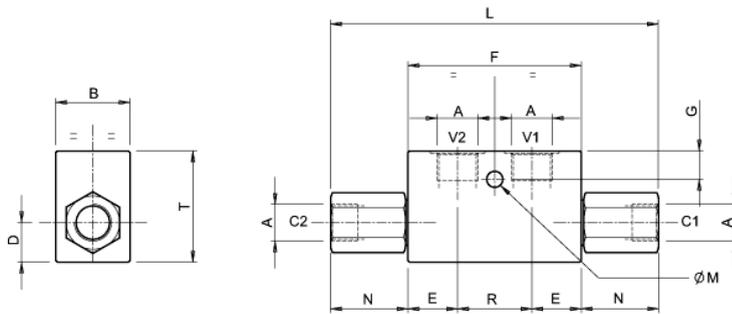

APPLICAZIONE: Le valvole VRSE sono utilizzate per bloccare in posizione un attuatore e renderlo insensibile alle forze esterne. Il passaggio del flusso avviene tramite un comando pilota. Sono particolarmente indicate per il montaggio su cilindri oleodinamici.

APPLICATION: VRSE valves are used to lock an actuator and make it insensitive to external forces. The passage of the flow is via a command pilot. They are particularly suitable for mounting on hydraulic cylinders.

IAM1032	IAF1032	2"	160	100	100	201	75	75	130

CARATTERISTICHE PRINCIPALI:

La serie A ha intercambiabilità e prestazioni secondo la normativa ISO 7241-A.

Si tratta di uno tra i più diffusi tipi di innesto rapido a livello internazionale e trova applicazione su un'ampia gamma di attrezzature mobili ed industriali.

- Intercambiabilità secondo ISO 7241-A
- Materiale standard: acciaio al carbonio
- Parte maschio in acciaio temprato ad induzione
- Valvole interne in acciaio temprato
- Guarnizioni standard in gomma nitrilica
- Anelli antiestrusione in teflon
- Temperatura di esercizio con guarnizioni standard: -20°C / +110° C
- Guarnizioni speciali a richiesta: Viton, EDPM, Neoprene

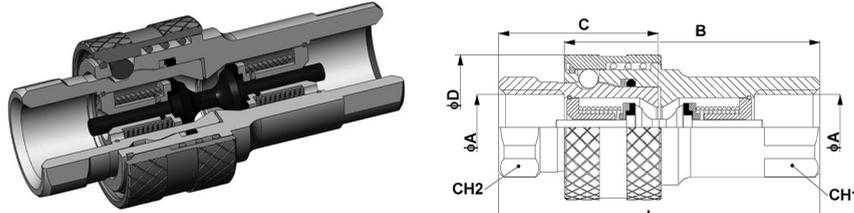

MAIN DATA:

Serie A is designed to interchange and perform according to ISO 7241-A standard.

Is it one of the most common coupling design worldwide and is indicated for several mobile and industrial applications.

- Interchangeability according to ISO 7241-A
- Standard Material: Carbon steel
- Plugs treated with induction hardening
- Internal valves in hardened steel
- Standard seals in nitril rubber
- Back-up seals in teflon
- Working temperature with standard nitril seals: -20°C / +110° C
- Special seats on request: Viton, EDPM, Neoprene

CARATTERISTICHE PRINCIPALI:

La serie AG corrisponde al tipo di intercambiabilità più diffusa a livello internazionale per applicazioni relative a macchine ed attrezzature agricole. La misura 1/2" è identica alla serie A ed è quindi intercambiabile secondo la norma ISO 7241 -A

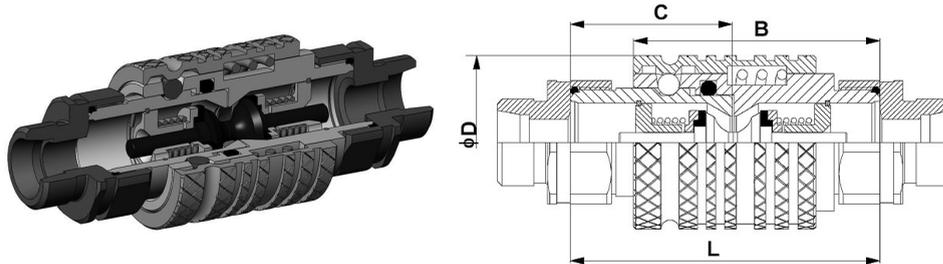

- Disponibile con valvola a funghetto o a sfera
- Materiale standard: acciaio al carbonio
- Parte maschio in acciaio temprato ad induzione
- Valvole in acciaio temprato
- Anelli antiestrusione in teflon
- Temperatura di esercizio con guarnizioni standard: -20°C / +110° C
- Guarnizioni speciali a richiesta: Viton, EPDM, Neoprene

MAIN DATA:

Serie AG design, also known as agricultural interchange, is probably the most popular coupling design worldwide on agricultural applications. The size 1/2" is identical to series A, ISO 7241-A interchangeable.

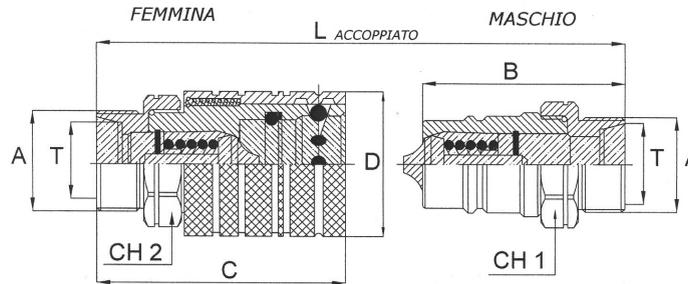

- Available with both poppet and ball valve
- Standard Material: carbon steel
- Plugs treated with induction hardening
- Internal valves in hardened steel
- Standard seals in nitril rubber
- Back-up seals in Teflon
- Working temperature with standard nitril seals: -20°C / +110° C
- Special seats on request: Viton, EPDM, Neoprene

CARATTERISTICHE PRINCIPALI:

La serie PP detta serie "push-pull" è disponibile con valvola a funghetto o a sfera in varie opzioni di filettatura: BSP, NPT e metrica 24° DIN 2353.

Questa serie viene tipicamente utilizzata su macchine ed attrezzature agricole dove si caratterizza per la possibilità di montaggio a parete con il possibile aggancio / sgancio con una sola mano.

Questo innesto è intercambiabile secondo le normative ISO 7241-A e ISO 5675

Valvola a funghetto o a sfera

Materiale: acciaio al carbonio

Valvole a funghetto in acciaio temprato

Guarnizioni standard in gomma nitrilica

Anelli antiestrusione in teflon

Temperatura di esercizio con guarnizioni standard: -20°C / +110° C

OPZIONI SPECIALI:

L'innesto è disponibile con una valvola speciale che permette aggancio anche in presenza di pressioni residue.

MAIN DATA:

The PP series push-pull couplings are interchangeable according to ISO 7241-A and ISO 5675.

These couplings are normally adopted on agricultural implements and applications; the possible panel mounting allows to easily connect and disconnect plug and socket with one hand only.

PP series couplings, are available with poppet valve and ball valve; the standard thread are BSP, NPTF and metric male 24° according to DIN 2353.

Available with both poppet and ball valve

Interchangeable ISO 7241-A and ISO 5675

Material : Carbon Steel

Poppet valve in hardened steel

Plug in hardened steel

Working temperature with standard seals -20°C / + 110°C

Standard seals in nitril rubber

Back-up ring in Teflon

SPECIAL OPTIONS:

A special valve is available on request to allow the plug to be connected in presence of residual back pressure.

VM 1048	VF 1048	3"	105	166	150	212	100	100	315	100

CARATTERISTICHE PRINCIPALI:

La serie V comprende innesti a vite in una gamma di dimensioni dal 1/4" a 2"1/2.

Si tratta di innesti particolarmente robusti, adatti alle più gravose applicazioni oleodinamiche ed industriali. Questi innesti vengono di solito adottati in presenza di alte pressioni pulsanti, vibrazioni ed altre forti sollecitazioni meccaniche.

- Materiale: acciaio al carbonio
- Valvole a funghetto in acciaio temprato
- Guarnizioni standard in gomma nitrilica
- Anelli antiestrusione in teflon
- Temperatura di esercizio con guarnizioni standard: -20°C / +110° C
- Guarnizioni speciali a richiesta: Viton, EPDM, Neoprene

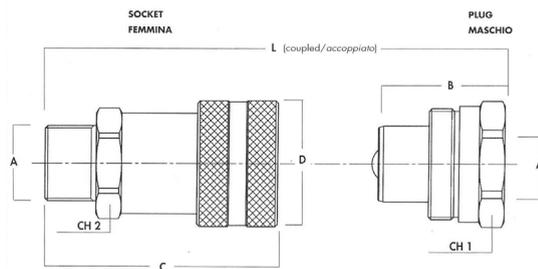

MAIN DATA:

Series V is a screw to connect coupling range available in sizes from 1/4" to 2"1/2.

This series is used in heavy duty hydraulic and industrial applications in presence of high pressure, vibrations, mechanical stresses.

- Material : Carbon Steel
- Internal valve in hardened steel
- Standard seals in nitril rubber
- Back-up seals in Teflon
- Working temperature with standard seals -20°C / + 110°C
- Special seals on request: Viton, EPDM, Neoprene

Serie VJ
Innesti a Vite per utensili idraulici
“Screw to connect for hydraulic tools”

Maschio Male	Femmina Female	A	B	C	D	L	CH1	CH2	PN
VJM2504	VJF2504	1/4"	40	72,3	35	86,9	32	24	700
VJM2506	VJF2506	3/8"	40	72,3	35	86,9	32	24	700

CARATTERISTICHE PRINCIPALI:

La serie VJ comprende innesti a vite per le altissime pressioni tipicamente utilizzate negli utensili idraulici.
Meccanismo di innesto a vite

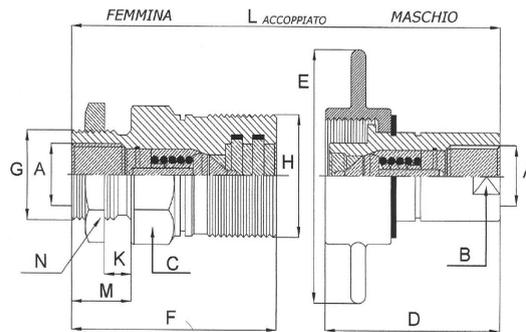

- Materiale: acciaio al carbonio
- Valvole a sfera
- Zincatura bianca
- Guarnizioni standard in gomma nitrilica
- Anelli antiestrusione in teflon
- Temperatura di esercizio con guarnizioni standard: -20°C / +110°C
- Tappi in metallo disponibili su richiesta

MAIN DATA:

Series VJ includes screw to connect couplings designed to mach the very high pressures used for hydraulic tools.

- Screw to connect
- Material : Carbon Steel
- Ball valve
- White zinc-plating
- Standard seals in nitril rubber
- Working temperature with standard seals -20°C / + 110°C
- Metal caps on request

Serie VT Innesti a Vite per camion “Screw to connect for Trucks”

Maschio Male	Femmina Female	A	B	D	H	L	M
VTM1012	VTF1012	3/4"	33	78	44x2,5	137	20
VTM1016	VTF1016	1"	40	83	54x2,5	154	26

CARATTERISTICHE PRINCIPALI:

La serie VT comprende innesti a vite per le altissime pressioni tipicamente utilizzate nei meccanismi dei camion.

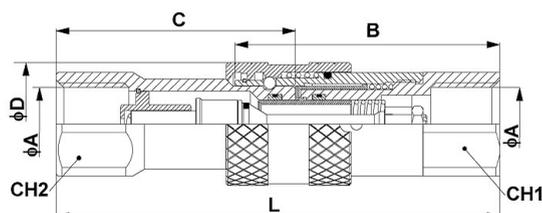

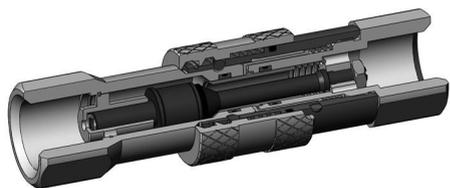

- Meccanismo di innesto a vite
- Materiale: acciaio al carbonio
- Valvole a sfera
- Guarnizioni standard in gomma nitrilica
- Anelli antiestrusione in Teflon
- Temperatura di esercizio con guarnizioni standard: -20°C / +110° C

MAIN DATA:

Series VT includes screw to connect couplings designed to mach the very high pressures used for trucks.

- Screw to connect
- Material : Carbon Steel
- Ball valve
- Standard seals in nitril rubber
- Back-up seals in Teflon
- Working temperature with standard seals -20°C / + 110°C

CARATTERISTICHE PRINCIPALI:

La serie FP comprende innesti a facce piane che trovano applicazione in molti settori oleodinamici ed industriali, offrendo tutti i vantaggi tipici di questo concetto costruttivo:

- Tenuta totale con innesti separati ed accoppiati
- Perdite di fluido bassissime nelle fasi di accoppiamento e sgancio
- Nessuna intrusione di agenti esterni durante le connessioni
- Facile pulizia delle superfici di accoppiamento
- Ghiera con sistema anti-sgancio
- Guarnizioni standard in gomma nitrilica
- Anelli antiestrusione in Teflon
- Temperatura di esercizio con guarnizioni standard: -20°C / +110° C
- Misura 3/8 (DN 9) intercambiabile secondo norme HTMA
- Guarnizioni speciali a richiesta: Viton e EPDM

MAIN DATA:

Serie FP flat face couplings are adopted on the most diversified hydraulic and industrial applications. The FO series flat face design offers important technical advantages:

- Perfect sealing of plug and socket both when coupled and uncoupled
- Extremely low spillage during connection and disconnection
- No inclusion of air or external media during connection and disconnection
- The flat faces are easy to clean
- Sleeve with a safety device preventing from accidental disconnection
- Standard seals in nitril rubber
- Antiextrusion ring in Teflon
- Working temperature with standard seals -20°C / + 110°C
- Body size 3/8 (DN 9) is interchangeable according to HTMA design
- Special seals on request: Viton and EPM

LIMITED WARRANTY

The Products sold or distributed by Seller are warranted to its customers to be free from defects in material and workmanship at the time of shipment by us, subject to the following provisions.

ALL WARRANTY CLAIMS SHALL BE MADE WITHIN SIX (6) MONTHS AFTER SELLER SHIPPED THE PRODUCTS. SELLER'S LIABILITY HEREUNDER IS LIMITED AT SELLER'S EXCLUSIVE DISCRETION, TO 1) THE PURCHASE PRICE OF ANY PRODUCTS PROVING DEFECTIVE; 2) REPAIR OF ANY DEFECTIVE PRODUCT OR PART THEREOF; OR 3) REPLACEMENT OF ANY DEFECTIVE PRODUCT OR PART UPON ITS AUTHORIZED RETURN TO SELLER. THIS WARRANTY IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, STATUTORY, OR OTHERWISE CREATED UNDER APPLICABLE LAW INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF MERCHANTABILITY AND THE WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL SELLER OR THE MANUFACTURER OF THE PRODUCT BE LIABLE FOR SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, INCLUDING LOSS OF PROFITS, WHETHER OR NOT CAUSED BY OR RESULTING FROM THE NEGLIGENCE OF SELLER AND/OR THE MANUFACTURER OF THE PRODUCT, UNLESS SPECIFICALLY PROVIDED HEREIN. IN ADDITION, THIS WARRANTY SHALL NOT APPLY TO ANY PRODUCTS OR PORTIONS THEREOF WHICH HAVE BEEN SUBJECTED TO ABUSE, MISUSE, IMPROPER INSTALLATION, MAINTENANCE, OR OPERATION, ELECTRICAL FAILURE OR ABNORMAL CONDITIONS, AND TO PRODUCTS WHICH HAVE BEEN TAMPERED WITH, ALTERED, MODIFIED, REPAIRED, REWORKED BY ANYONE NOT APPROVED BY SELLER, OR USED IN ANY MANNER INCONSISTENT WITH THE PROVISIONS OF THE

"CAUTIONARY STATEMENT" OR ANY INSTRUCTIONS OR SPECIFICATIONS PROVIDED WITH OR FOR THE PRODUCT.

Cautionary statement

All Products sold and distributed by VEBAgroup SpA are in the nature of commodities and they are sold by published specifications and not for particular purposes, uses or applications. Purchaser shall first determine their suitability for the intended purposes, uses or applications and shall either conduct its own engineering studies or tests, or retain qualified engineers, consultants or testing laboratories and consult with them before determining the proper use, suitability or propriety of the merchandise or Products for the intended purposes, uses or applications.

VEBAgroup SpA ("Seller") does not recommend the Products for any particular purpose, use or application, and the Purchaser or user thereof shall assume full responsibility for the suitability, propriety, use and application of the Products. Purchaser shall follow all instructions contained in Seller's catalogues, brochures, technical bulletins and other documents regarding the Products. The Products, including but not limited to, hose, tubing or couplings, may fail due to the use or conveyance of substances at elevated or lowered temperatures or at excessive pressure, the conveyance of abrasive, injurious, inflammable, explosive or damaging substances. Hose or tubing used in bent configurations will be subjected to increased abrasion. Hose clamps or couplings may loosen after initial installation and all sections of hose and tubing including connections, couplings, clamps, conductivity and bonding should be inspected frequently, regularly and consistently, and should be replaced, adjusted or re-tightened for the avoidance of leakage, for the prevention of injuries or damages,

and for general safety purposes. Except as indicated in its Limited Warranty, Seller shall not be liable or responsible for direct or indirect injuries or damages caused by or attributed to the failure or malfunction of any Products sold or distributed by it.

Purchasers or users of the Products should frequently and consistently undertake inspections and protective measures with respect to the use and application of Products, which should include the examination of tube and cover, conditions of the hose or tubing, and the identification, repair or replacement of sections showing cracking, blistering, separations, internal and external abrasions, leaking or slipped couplings or connections and make proper proof tests.
